TECHNICAL SKILLS

Languages

C#, Java, PHP, JavaScript,
TypeScript, SQL, HTML, CSS

Frameworks

.NET 9, React, Next.js, Node.js,
Express, Spring Boot, Tailwind CSS

Databases

PostgreSQL, SQL Server, MySQL,
Supabase

DevOps & Cloud

Docker, Git, CI/CD, GitHub Actions,
Linux, AWS, Azure

Networking & Infrastructure

Cisco CCNA, Routing, Switching,
TCP/IP

Architecture & AI

Clean Architecture, REST APIs,
System Design, OpenAI APIs, LLMs,
RAG

Advanced

JOHAN GABRIEL VÁSQUEZ

FULL-STACK SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY

Software Developer specializing in full-stack development, system design, and building modern, robust applications. Hands-on experience architecting scalable backend systems using Clean Architecture, designing maintainable RESTful APIs, and integrating AI-driven features into real-world software. Strong foundation in object-oriented programming, cloud architecture, and version control.

EXPERIENCE

SupportMind AI

Next.js / OpenAI / Node.js

github.com/Johanvasquezdev/supportmind-ai

- Engineered an intelligent customer support application leveraging Retrieval-Augmented Generation (RAG) to process user queries and deliver automated responses via LLMs.
- Designed a responsive, low-latency frontend using Next.js and Tailwind CSS, ensuring seamless user interactions and real-time state management.

MedAgenda

C# / .NET / SQL Server

github.com/Johanvasquezdev/MedAgenda

- Architected a healthcare scheduling backend using a strict multi-layered Clean Architecture, separating core business logic from data access to ensure high maintainability.
- Implemented dependency injection and secure RESTful API endpoints to efficiently manage patient records and prevent scheduling conflicts.

ImportCost Pro

C# / .NET 9 / SQL

github.com/Johanvasquezdev/ImportCost-Pro

- Created a financial utility application that automates the calculation of import taxes, shipping fees, and profit margins for e-commerce products.
- Structured complex mathematical algorithms into isolated, testable service layers, ensuring high accuracy in financial outputs.

EDUCATION

Instituto Tecnológico de Las Américas (ITLA)

May 2027

Software Development Technologist

MESCYT

August 2026

Advanced English Immersion Program

Colegio Cristo de los Milagros

Completed

Computer Science Technician
